HOT WATER SUIT

The Hunter Hot Water Suit body is manufactured from our unique VSN stretch trilaminate material. This produces a suit which is only 1mm thick, has defined stretch, and will not compress. The Armatex jersey nylon is also extremely abrasion resistant. The material is stable, and will not shrink when subjected to constant drying. The On/Off valve is unique to Hunter and has a maximum working pressure of 40 Bar. Suit includes neoprene collar, neoprene zip flap and 2 front mounted pockets. Centre zip is non corroding plastic.

This suit is not currently CE certified.

| | STANDARD CHARGE | 161.00 |

2. Modified suits are non returnable.

See accessory pages for items such as pockets, relief zips, warm neck collars, and cylinder pouches that can be added to these suits.

PRO-VSN 1100 SUITS

VSN stretch trilaminate material was developed by Hunter back in 1998. The material has some unique properties such as being only 1mm thick. The material is a specially compounded rubber with no open cell structure which makes it non compressible, and neutrally buoyant. The outer lining is ARMATEX nylon which is extremely hard wearing. Because of its stretch properties, the suits feature a slim cut, with minimum seam layout. Suits have vulcanised seams, neoprene lined boots, internal detachable braces, carry bag / changing mat manual and service items. REAR ENTRY ONLY

Colour: Black/Black

| CODE | REF | DESCRIPTION | RETAIL |
|--------|-------|---|---------|

| S70057 | VSN3T | Suit with inlet valve, hose and cuff dump | 2912.00 |

PRO-VSN TT FE

The latest addition to the VSN family. This is a front entry suit which has an overlength torso which is held in place by the braces being located in the lower body. The excess material telescopes up, and is held under a waistband. The suit then flexes with the diver as he bends and stretches. Complete with all of the usual fittings - neoprene lined boots, detachable braces, carry bag / changing mat, manual and service items. FRONT ENTRY ONLY

Colour: Black/Black

| CODE | REF | DESCRIPTION | RETAIL |

Adhesives

We are unable due to Health and Safety and Dangerous Goods legislation to transport adhesives.

Recommendations:

Nylon Suits (for attaching seals, hoods etc). Bostik 2402, Tivofix 8000 or any similar 2 part adhesive

Rubber Suits (for seals and repairs) Tivofix 3140 or equivalent P.U. adhesive with Apollo AS 007 Ethyl Acetate Wad, or mix Natural Rubber with Heptane (1kg + 15 ltr) with Desmadur Accelerator.

VSN Suits - (for attaching seals) - Tivofix 3140 or equivalent P.U. adhesive (for attaching hoods) - Tivofix 8000 or equivalent.
